## Management SECURITY GUARD AND SECURITY SUPERVISOR WITH SECURITY OFFICERS

A security guard, security officer, or protective agent is a private person who is hired to protect an organization's assets (property, people, equipment, money, etc.) from a variety of hazards (such as waste, damaged property, unsafe worker behaviour, criminal activity such as theft, etc.) by using preventative measures. They do this by maintaining a high-visibility presence to deter illegal and inappropriate actions, observing (either directly, through patrolling, or by watching alarm systems or video cameras) for signs of crime, fire or disorder; then taking action to minimize damage (example: warning and escorting trespassers off property) and reporting any incidents to their client and emergency services, such as police and ambulance, as appropriate.

Security officers are generally uniformed to represent their lawful authority to protect private property. Security guards are generally governed by legal regulations, which set out the requirements for eligibility (e.g., a criminal record check) and the permitted authorities of a security guard in a given jurisdiction. The authorities permitted to security guards vary by country and sub national jurisdiction. Security officers are hired by a range of organizations, including businesses, government departments and agencies and not-for-profit organizations (e.g., Temples, Mosques, churches and charitable institutions)

## RECRUITMENT AND TRAINING

We are having our own Training School at Bar Village in Jaitaran Tehsil, District Pali, Rajasthan.

We impart specialized training to the selected personnel at our Security Training Schools. Assessment of all the security personnel through a written and aptitude test is conducted on completion of the training program. Industrial Security services understand the importance of effective unarmed security guard training in order to meet and exceed the needs of its clients and officers, as well as the continuous rising demands of homeland security initiatives. The training program is designed to allow each security officer the opportunity for a clear road to success.

This entails three phases : Core training topics: basic security officer duties – awareness, officer conduct, reporting, principles of communication.

Customer specification focus: specific duties and procedures relating to the job at the customer's site. Promote and provide ongoing training: encourage each officer's professionals development.

## DEPLOYMENT

On successful completion of the specialized training, we deploy these personnel to undergo seventeen days practical training. We also impart Refresher Training Modules at regular intervals.

CLIENTS
